

Info!

March 2021

To residents of Gluntens väg 19

Information prior to the works in the apartments.

We have now started the renovation work. The roof is currently being remodelled to accommodate the new ventilation unit.

Work on drilling between the floors/basement has started. This part of the work will involve some noise during the daytime. There will be some drilling noise during this period. We understand that this affects those of you who live in the building and we appreciate your patience.

Earplugs will be available on the entrance level.

The work in the apartments

Work to install the new ventilation ducts into the apartments is expected to start in mid-April.

Previous information about starting in the apartments in early March was incorrect. We apologise for that!

Work in all apartments is expected to be completed by mid-June.

- It is estimated that the main work in your apartment will take 2-4 days.
- We will start work from the ground floor up.
- Finishing work, such as adjusting the ventilation, will be carried out once all the apartments have been dealt with.

Notification of start of work in your apartment

Once the contractor, Umia AB, advises that the work in your apartment is due to start, you will receive a drawing of where the ventilation ducts will be laid in your apartment.

Consideration for the coronavirus situation

When it is time for the work in your apartment, the contractor will explain how they will work in a covid-safe manner. We are following all the recommendations of the Public Health Agency of Sweden.

Yours sincerely,
Bostaden
